In need of a chiller quickly? Due to on-going supply chain disruptions, lead times for commercial chillers are now stretching up to 16 weeks — causing a severe delay for emergency situations in which your facility's chiller goes down and your occupants are left without **chilled water for air conditioning or manufacturing processes**.

Fortunately, TEAL has 80- to 250-ton Carrier brand chillers in stock, available for immediate delivery. Contact our team to learn more.
